ME3023 - Measurements in Mechanical Systems

Mechanical Engineering

Tennessee Technological University

Topic 2 - DAQ Hardware and Applications

Topic 2 - DAQ Hardware and Applications

- Signal Types and DAQ
- Noise Considerations
- Available Hardware
- Software Integration

Signal Types and DAQ

Most data acquisition devices and systems measure and record **analog** voltage signals and possibly additional signal types. Signal **generation** may also be a feature on some systems.

A voltage signal requires a **common** reference or **ground**.

Signal Sources:

- Grounded or Ground-Referenced
- Ungrounded or Floating

Measurement (DAQ) Systems:

- Common Ground
- Common Mode Voltage
- Isolated Ground

Signal Types and DAQ

Most data acquisition devices and systems measure and record **analog** voltage signals and possibly additional signal types. Signal **generation** may also be a feature on some systems.

2 Major Configurations:

- Single-Ended Signals

The signal is measured as a voltage between a **single** conductor and the **ground** which must be carried on a separate conductor or wire.

- Double-Ended (Differential) Signals

The signal is measured as the **difference** between two voltages (**double**) carried on separate conductors, or wires. Typically a **ground** is shared between the two devices requiring a third conductor.

Signal Types and DAQ

Single-Ended Signals

Pros:

Cons:

Double-Ended Signals

Pros:

Cons:

Noise Considerations

Electromagnetic Interference: An electromagnetic disturbance that interrupts, obstructs, or otherwise degrades or limits the effective performance of electronics/electrical equipment.

A *combination* of naturally occurring and human made sources of interference is always present. The total EMI affecting a system is determined by the local conditions as well as global environmental influences.

Sources of EMI:

- Television Transmission, Cellular Networks, AM FM Radio
- Lightning Storms, Solar Activity
- Power Transmission Lines
- Electronic Devices such as power supplies, motors, welders
- Intentional (weaponized) EMI

Available Hardware

- National Instruments
- Measurement Computing
- dSPACE
- Arduino or other

Software Integration

- National Instruments - L
- Measurement Computing
- dSPACE
- Arduino or other

Software Integration
