

Lecture Module - Introduction

ME3023 - Measurements in Mechanical Systems

Mechanical Engineering

Tennessee Technological University

Topic 1 - General Measurement System

Topic 1 - General Measurement System

- Welcome Back!
- Definition of a Measurement
- Measurement System Stages
- Brainstorming Activity

Welcome Back!

Notes about class:

- These lecture notes can be found on ilearn under **Content > Lecture Modules**.
- The material will be organized in 10 to 15 min lectures. You are encouraged to ask questions.
- Lectures and most discussions will be recorded. You can watch them anytime.
- Lectures will be followed by a class activity to be submitted by the end of the class session.

Definition of a Measurement

“A _____ is an act of assigning a specific value to a physical variable.”

Text: Theory and Design of Mech. Meas.

Measurement System Stages

Figure 1.5 Components of a general measurement system.

Image: Theory and Design of Mech. Meas.

Sensor-Transducer Stage

a _____, a physical element that employs some natural phenomenon... ..to sense the variable being measured

A **transducer** converts the sensed information into a

Text, Image: Theory and Design of Mech. Meas.

Signal Conditioning Stage

What is the the definition of **signal**?

- Filtering
- Amplification
- Attenuation
- Excitation
- Linearization
- Electrical Isolation
- Surge Protection

Image: Theory and Design of Mech. Meas.

Output Stage

The _____ indicates or records the value measured. This might be a simple readout display, a marked scale, or even a recording device such as a computer disk drive.

Brainstorming Activity

Activity: Team Brainstorm

Duration: ~ 10 minutes

Topic: You are designing a probe to inspect an environment which can only be accessed from above. The goal is to collect as much information as possible from the environment to prepare for a robotic maintenance task.

- Probe must enter environment through hole ~ 100mm wide
- Probe must exit through same hole leaving nothing behind
- The allowable EMI and RFI is limited. No wifi communication is available

Deliverable: Submit a copy of your Team brainstorming notes including text, images, diagrams to the activity assignment on ilearn. Include names of all team members.

Examples in Mechanical Engineering

IDETC2022-96785: Development of an Instrumented Rear Suspension to Measure the Tire Forces of a Race Car During Track Driving

Examples in Mechanical Engineering

IDETC2022-91154: Photometric Stereo Enhanced Light Sectioning
Measurement for Microtexture Road Profiling

Examples in Mechanical Engineering

IDETC2022-90082: Automated Weld Path Generation Using
Random Sample Consensus and Iterative Closest Point Workpiece
Localization
