Topic 1 - General Measurement System

Topic 1 - General Measurement System

- Welcome Back!
- Definition of a Measurement
- Measurement System Stages
- Examples in Mechanical Engineering

Welcome Back!

- Summer school is different but we will still cover the same material as we would in the regualar semester.
- These new outlines should help keep me/us on track.
- \bullet The material will be organized in ~ 10 min videos, and you can watch them at anytime.

Definition of a Measurement

"A	_is an act of assigning a specific value to	a
physical variable."		

Text: Theory and Design of Mech. Meas.

Measurement System Stages

Figure 1.5 Components of a general measurement system.

Sensor-Transducer Stage

a ______, a physical element that employs some natural phenomenon... ...to sense the variable being measured

A transducer converts the sensed information into a

Signal Conditioning Stage

What is the the definition of signal?

- Filtering
- Amplification
- Attenuation
- Excitation
- Linearization
- Electrical Isolation
- Surge Protection

Output Stage

The ______indicates or records the value measured. This might be a simple readout display, a marked scale, or even a recording device such as a computer disk drive.

Examples in Mechanical Engineering

Image: T.Hill

3D printers (FDM) use PLA, ABS, PETG and other plastics which absorb moisture from the air over time causing adverse affects on part quality. This is particularly a problem in humid climates such the southeastern USA.

Engineering Example

Fortunately the *water-logged* plastic can be dehydrated for further use.

Inspect the DIY filament dryer shown and Identify each of the following measurement stages.

- Sensor Transducer
- Signal Condtioning
- Output Stage
- Feedback Control ?
